

SaloneUfficio  
Fiera Milano, Rho, 12/17.04.2011

Pad. 24 - StandE02

**EXHIBITIONS & EVENTS:** SaloneUfficio 2011 - 12.17 April

**PAV. 24 Stand E02**, these are our references to the next **SaloneUfficio** inside the **International Furniture Exhibition of Milan** at Rho Fair.

An international event (closed to about 300,000 visits during the last edition) within which we shall exhibit our latest new products as regards seating for communities.

All **OLA** collection, **comfortable and functional** but at the same time elegant seats will be exhibited and we shall propose them in 5 colour variants and in the different models (including the bench for waiting rooms).

Besides, there will be an **exclusive preview** of the brand **new Vale Cantilever**.

**PRODUCT NOVELTY:** Vale, a harmony of shapes

**Vale (design by Perin & Topan)** is a seating with a **harmonic silhouette** made up of clean and never rigid essential lines for a sober elegance aiming at reducing the unnecessary.

The frame is made of chrome steel wire providing elasticity and very high resistance to stress. The armrests are one with the supporting structure, their fastening, in fact, is with hidden screws.

**Being ideal for waiting rooms, offices and public areas in general** for its style thanks to which it may be assembled in any environment, the seating is proposed in the following versions:

- Iron rod sled with or without armrests and in the models with writing tablet and linking device.
- Cantilever base (or sled) made of 25 diameter Asform tube (novelty)

It is available in the basic colours of white and anthracite (wide range of colours upon request), **it is easily stackable and it may be transported** up to 20 units by means of the special handy trolley.

Vale is available also in the fire retardant version class 1.

Bericoplast products are completely manufactured in Italy with 95% recyclable materials.

**PRESS AREA** - We are published in the following journals and web publications:
